NexGard® (afoxolaner) SATISFACTION GUARANTEE

Flea and tick control is an essential part of a pet’s preventive healthcare, and we want pet owners to have full confidence in the choices that they make to protect their dogs. To help provide peace of mind to pet owners and to show the confidence that we have in NexGard, Boehringer Ingelheim, the leader in flea and tick control, is proud to offer the NexGard SATISFACTION GUARANTEE.

NexGard is labeled to kill adult fleas and is indicated for the treatment and prevention of flea infestations, and the treatment and control of black-legged tick, American dog tick, Lone Star tick, and brown dog tick infestations in dogs and puppies 8 weeks of age and older, weighing 4 pounds of body weight or greater, for one month. It is also indicated for the prevention of *Borrelia burgdorferi* infections as a direct result of killing *Ixodes scapularis* vector ticks (black-legged ticks).

If you have questions about NexGard, or if you are not satisfied with NexGard, please call our experts on the Veterinary Technical Solutions (VeTS) team at 888-637-4251.

FLEA SATISFACTION GUARANTEE GUIDELINES

- Because the flea life cycle can vary from 2 weeks to several months, it may take several monthly administrations of any flea control product to break the flea life cycle. Therefore you are required to use NexGard for at least 3 consecutive months in the affected dog to be eligible.
- The guarantee is available for the most recent purchase of 3 or 6 doses. NexGard must have been used consistently in the affected dog for the 3 months prior to the claim. You may choose to receive either one replacement package of the same NexGard product, a refund for the purchase price, or an in-home inspection by a professional pest control specialist. Taxes are not reimbursable. In some instances, product replacement may not be an option.
- Should you choose the in-home inspection, treatment will be provided if deemed necessary by the pest control specialist. Boehringer Ingelheim will contact the pest control service and have them schedule a service date with you. Boehringer Ingelheim will cover the cost of the visit by paying the pest control service directly. You must allow the pest control specialist into the home if an inspection is desired. One free professional in-home inspection per household.

IMPORTANT SAFETY INFORMATION: NexGard® (afoxolaner) is for use in dogs only. The most frequently reported adverse reactions include vomiting, itching, lethargy, diarrhea and lack of appetite. The safe use of NexGard in pregnant, breeding, or lactating dogs has not been evaluated. Use with caution in dogs with a history of seizures or neurologic disorders. For more information, see the full prescribing information or visit NexGardForDogs.com.
**NexGard**® (afoxolaner) **LYME SATISFACTION GUARANTEE**

If your dog is found to be positive for *Borrelia burgdorferi* infection after consistent use of **NexGard**® (afoxolaner) (**B. burgdorferi** antibody seropositive for first time since last negative test), Boehringer Ingelheim (BI) will provide financial support to your veterinarian to conduct additional testing with either the Cornell Canine Lyme Multiplex or the IDEXX® “Quantitative C6” Antibody test, as well as urinalysis and urine protein: creatinine ratio, if desired. Your veterinarian should contact VeTS at 888-637-4251 to make these arrangements in advance of the testing. If a positive diagnosis is confirmed, BI will reimburse your veterinarian for treatment with appropriate antibiotics.

**LYME SATISFACTION GUARANTEE GUIDELINES**

- To be eligible, you or your veterinarian must submit evidence of the dog’s negative Lyme test within one month of the pet starting **NexGard** as well as negative annual tests thereafter. Any commercially available test indicated for the detection of exposure to *Borrelia burgdorferi* will be acceptable.
- For puppies that are started on **NexGard** prior to 4 months of age, a negative test is still recommended but not required to be eligible for the first year of coverage.
- The affected dog must have appropriate purchase history showing enough purchases of **NexGard** to have received the product consistently each month from the date of the negative test through the date of the claim. LYME SATISFACTION GUARANTEE cases are not eligible for product refund or replacement.
- While some diagnostic tests for Lyme infection can detect an infection as early as 3 weeks post-exposure, it can take up to 3 months for some currently available tests. For this reason, it is recommended (though not required for the guarantee) that dogs be tested for Lyme infection approximately 3 months after starting **NexGard** to ensure that the dog was not exposed prior to initiation of **NexGard** treatment.

**GENERAL ELIGIBILITY**

- The guarantee is not retroactive. To qualify for any portion of the guarantee, reports must be received within 6 months of the incident in question. Please ensure that your veterinarian contacts VeTS to discuss support in advance of testing or treatment. BI will not be responsible for any diagnostic or treatment-related costs that were made prior to contacting VeTS.
- An itemized receipt for the purchase of **NexGard** (afoxolaner) for the affected dog must be submitted to BI. For the FLEA SATISFACTION GUARANTEE, itemized receipts for the purchase of flea control for all pets in the home are required. The receipt must show the place of purchase, the date of purchase, the product brand name, the amount of product purchased, and the purchase price. For the LYME SATISFACTION GUARANTEE, the affected dog’s medical records will be required showing Lyme testing history and **NexGard** purchase history. For the LYME SATISFACTION GUARANTEE PLUS, the records required for the LYME SATISFACTION GUARANTEE as well as documentation showing administration of RECOMBITEK Lyme within the previous twelve months must be submitted.
- **NexGard** must have been purchased from a veterinary clinic or with a written prescription via a valid veterinarian-client-patient relationship. BI reserves the right to request that original receipts be submitted via fax, email, or mail before a guarantee claim will be processed.
- The guarantee claim can only be processed for the individual whose name appears on the receipt.
- The guarantee is only valid for product labeled in the United States.
- Please allow 4-6 weeks for processing of refunds.
- Product that has been obtained free of charge is not eligible for the guarantee.
- This guarantee is limited to the FLEA SATISFACTION GUARANTEE and LYME SATISFACTION GUARANTEE as described above.
- BI reserves the right to cancel or amend the guarantee program at any time.

**IMPORTANT SAFETY INFORMATION:** **NexGard**® (afoxolaner) is for use in dogs only. The most frequently reported adverse reactions include vomiting, itching, lethargy, diarrhea and lack of appetite. The safe use of **NexGard** in pregnant, breeding, or lactating dogs has not been evaluated. Use with caution in dogs with a history of seizures or neurologic disorders. CAUTION: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

Description: NexGard® (afoxolaner) is available in four sizes of beef-flavored, soft chewables for oral administration to dogs and puppies according to their weight. Each chewable is formulated to provide a minimum afoxolaner dosage of 1.14 mg/lb (2.5 mg/kg). Afoxolaner has the chemical composition 1-Naphthylcarboxamide, 4-[3-chloro-5-( trifluoromethyl) phenyl]-4, 5-dihydro- 5-( trifluoromethyl)-3-isoxazolin-N (2-oxo-2-C,2,2-trifluoromethylo) anilinoethyl.

Indications: NexGard kills adult fleas and is indicated for the prevention and treatment of flea infestations (Ctenocephalus felis) and the treatment and control of Black-legged tick (Ixodes scapularis). American Dog tick (Dermacentor variabilis), Lone Star tick (Amblyomma americanum) and Brown dog tick (Rhipicephalus sanguineus) infestations in dogs and puppies 8 weeks of age or older, weighing 4 pounds of body weight or greater, for one month. NexGard is indicated for the prevention of Borrelia burgdorferi infections as a result of killing ixodid scapularis vector ticks.

Dosage and Administration: NexGard is given orally once a month, at the minimum dosage of 1.14 mg/lb (2.5 mg/kg).

Dosing Schedule:

<table>
<thead>
<tr>
<th>Body Weight</th>
<th>Afoxolaner Per Chewable (mg)</th>
<th>Chewables Administered</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0 to 10.0 lbs.</td>
<td>11.3</td>
<td>One</td>
</tr>
<tr>
<td>10.1 to 24.0 lbs.</td>
<td>28.3</td>
<td>One</td>
</tr>
<tr>
<td>24.1 to 60.0 lbs.</td>
<td>68</td>
<td>One</td>
</tr>
<tr>
<td>60.1 to 121.0 lbs.</td>
<td>136</td>
<td>One</td>
</tr>
</tbody>
</table>

Over 121.0 lbs. Administer the appropriate combination of chewables.

NexGard can be administered with or without food. Care should be taken that the dog consumes the complete dose, and treated animals should be observed for a few minutes to ensure that part of the dose is not lost or refused. If it is suspected that any of the dose has been lost or if vomiting occurs within two hours of administration, re-dose with another full dose. If a dose is missed, administer NexGard and resume a monthly dosing schedule.

Flea Treatment and Prevention: Treatment with NexGard may begin at any time of the year. Group treated with NexGard and control groups treated with miticide and downside. Five treated dogs experienced vomiting (with and without blood) throughout the study, with a similar incidence in the treated and control groups, and a similar incidence in the treated and control groups. Five treated dogs experienced vomiting (with and without blood) throughout the study, with a similar incidence in the treated and control groups.

Tick Treatment and Control: Treatment with NexGard may begin at any time of the year (see Effectiveness).

Contraindications: There are no known contraindications for the use of NexGard.

Warnings: Not for use in humans. Keep this and all drugs out of the reach of children. In case of accidental ingestion, contact a physician immediately.

Keep NexGard in a secure location out of reach of dogs, cats, and other animals to prevent accidental ingestion or overdose.

Precautions: Afoxolaner is a member of the isoxazoline class. This class has been associated with neurologic adverse reactions including tremors, ataxia, and seizures. Seizures have been reported in dogs receiving isoxazoline class drugs, even in dogs without a history of seizures. Use with caution in dogs with a history of seizures or neurologic disorders.

The safe use of NexGard in breeding, pregnant or lactating dogs has not been evaluated.

Adverse Reactions: In a well-controlled laboratory study, NexGard demonstrated 100% effectiveness against adult fleas 24 hours post-infestation for 35 days, and was ≥93% effective at 12 hours post-infestation through Day 21, and on Day 35. On Day 28, NexGard was 11.1% effective 12 hours post-infestation. Dogs in both the treated and control groups that were infested with fleas on Day-1 generated fleas eggs at 12- and 24-hours post-treatment (0-1 eggs and 1-17 eggs in the NexGard treated dogs, and 4-90 eggs and 0-118 eggs in the control dogs, at 12- and 24-hours, respectively). At subsequent evaluations post-infestation, fleas from dogs in the treated group were essentially unable to produce any eggs (0-1 eggs) while fleas from dogs in the control group continued to produce eggs (1-141 eggs).

In a 90-day US field study conducted in households with existing flea infestations of varying severity, the effectiveness of NexGard against fleas on the Day 30, 60 and 90 visits compared with baseline was 98.0%, 99.7%, and 99.9%, respectively. Collectively, the data from the three studies (two laboratory and one field) demonstrate that NexGard kills fleas before they can lay eggs, thus preventing subsequent flea infestations after the start of treatment of existing flea infestations.

In a well-controlled laboratory study, NexGard demonstrated ≥97% effectiveness against Ixodes scapularis, >94% effectiveness against L. americanum, >93% effectiveness against Rhipicephalus sanguineus, 48 hours post-infestation for 30 days. At 72 hours post-infestation, NexGard demonstrated ≥97% effectiveness against Amblyomma americanum for 30 days. In two separate, well-controlled laboratory studies, NexGard was effective at preventing Borrelia burgdorferi infections after dogs were infested with Ixodes scapularis vector ticks 28 days post-treatment.

Animal Safety: In a range of safety study, NexGard was administered orally to 8 to 9-week-old Beagle puppies at 1, 3, and 5 times the maximum exposure dose (8.3 mg/kg) for three treatments every 28 days, followed by three treatments every 14 days, for a total of six treatments. Dogs in the control group were sham-dosed. There were no clinically-relevant effects related to treatment on physical examination, body weight, food consumption, clinical pathology (hematology, clinical chemistry, or coagulation tests), gross pathology, histopathology or organ weights. Vomiting occurred throughout the study, with a similar incidence in the treated and control groups.

In a well-controlled field study, NexGard was used concomitantly with other medications, such as vaccines, anthelmintics, antibiotics (including topical), steroids, NSAIDS, anesthetics, and antihistamines. No adverse reactions were observed from the concomitant use of NexGard with other medications.

Storage Information: Store at or below 30°C (86°F) with excursions permitted up to 40°C (104°F).

How Supplied: NexGard is available in four sizes of beef-flavored soft chewables: 11.3, 28.3, 68 or 136 mg afoxolaner. Each chewable size is available in color-coded packages of 1, 3 or 6 beef-flavored chewables.

Approved by FDA under NADA # 141-406
