

This product has been shown to be effective for the vaccination of healthy swine 3 weeks of age or older against Porcine Circovirus Type 2 (PCV2), *Mycoplasma hyopneumoniae*, and respiratory form of Porcine Reproductive and Respiratory Syndrome (PRRS) virus. The duration of immunity is at least 4 months against the respiratory form of PRRS disease, at least 4 months against PCV2, and at least 26 weeks against *Mycoplasma hyopneumoniae*. For more information regarding efficacy and safety data go to [productdata.aphis.usda.gov](http://productdata.aphis.usda.gov).

**Composition:** This product contains PCV2a.

**Precautions:** Store at 35-46°F (2-8°C). Do not freeze. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. Do not mix with other products, except as specified on this carton. In case of anaphylactoid reaction, administer epinephrine. Not for use in pregnant swine or boars. Indicated for use in PRRS virus-positive herds only. Vaccine virus may be shed and transmitted to other populations of swine in contact with vaccinated swine. The duration of potential vaccine virus transmission may vary. Use of the vaccine in herds intended to remain PRRS virus seronegative is contraindicated. Introduction of vaccinated pigs into herds intended
