

Diaque®

THE

REHYDRATING SOLUTION

THAT DELIVERS MORE FLEXIBLE FEEDING
OPTIONS FOR CALVES*

1 Manages dehydration and replaces lost electrolytes

Calves quickly absorb water and electrolytes for rapid rehydration.

4 Helps keep calves on milk for essential nutrition

It's flexible enough to be fed with water, milk or milk replacer.

2 Addresses acidosis without changing stomach pH

A three-step buffering system manages dehydration and acidosis while maintaining stomach acidity for proper milk digestion.

5 Is versatile

DIAQUE rehydrating solution is beneficial to calves experiencing:

- Stress
- Scours (diarrhea)
- Changes in feed
- Environmental changes, such as weather or transportation

3 Specifically formulated to support gut health and restore energy.

Contains patented hydrophobic citrus fibers to inhibit the growth of bacteria and support normal gut health. DIAQUE rehydrating solution provides calves with energy in the form of glucose (a form of sugar) and glycine.¹

* Approved for use in calves, crias, foals, kids, lambs and pigs.

¹ Goodell GM, Campbell J, Højvang-Nielsen L, et al. An alkalinizing oral rehydration solution containing lecithin-coated citrus fiber is superior to a non-alkalinizing solution in treating 360 calves with naturally acquired diarrhea. *J Dairy Sci* 2012;95(11):6677-6686.
