**Indications:** This product has been shown to be effective for the vaccination of healthy cattle and sheep against *Clostridium chauvoei*, *Cl. septicum*, *Cl. haemolyticum*, *Cl. novyi*, *Cl. sordellii* and *Cl. perfringens* types C and D. This product was licensed prior to the requirement to establish a minimum age for use. The duration of immunity has not been determined. For more information regarding efficacy and safety data go to [productdata.aphis.usda.gov](http://productdata.aphis.usda.gov).

Although *Cl. perfringens* type B is not a significant problem in the U.S.A., immunity may be provided against the beta and epsilon toxins elaborated by *Cl. perfringens* type B. This immunity is derived from the combination of type C (beta) and type D (epsilon) fractions.

**Directions and dosage:** Mix well before use.  
**Cattle:** Using aseptic technique, inject 5 mL subcutaneously. Repeat in 21 to 28 days.  
**Sheep:** Using aseptic technique, inject 2.5 mL

**Clostridium Chauvoei-  
Septicum-Haemolyticum-  
Novyi-Sordellii-Perfringens  
Types C & D-  
Bacterin-Toxoid**

**BAR-VAC® 8**

50 mL/10 Cattle Doses  
or 20 Sheep Doses

subcutaneously. Repeat in 21 to 28 days. Contact your veterinarian or the manufacturer for information on revaccination frequency.

**Precautions:** Store out of direct sunlight at 35-46°F (2-8°C). Do not freeze. Do not mix with other products. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. Transient swelling may occur at the injection site. In case of anaphylactoid reaction, administer epinephrine. This product has not been tested in pregnant animals. In case of human exposure, contact a physician.

**Preservative:** Phenol
